Task 3 - API Integration Project - Daily Quotes App

Description:
A web application that fetches random inspirational quotes dynamically using DummyJSON public REST API. The app displays quotes with author names, has a loading animation, error handling and a copy to clipboard feature.

API Used:
- Name: DummyJSON Quotes API
- Endpoint: https://dummyjson.com/quotes/random
- Type: Public REST API (No authentication required)
- Data Format: JSON

Technologies Used:
- HTML
- CSS
- JavaScript (Fetch API, Async/Await)

Features:
- Fetches random quote from API on page load
- New Quote button for fresh quotes
- Loading animation while fetching
- Error handling if API fails
- Copy quote to clipboard

Code Snippet (JavaScript - Fetch API):

```
async function fetchQuote() {
  const response = await fetch("https://dummyjson.com/quotes/random");
  const data = await response.json();

  quoteText.textContent = data.quote;
  quoteAuthor.textContent = "— " + data.author;
}
```

Deliverables:

1. GitHub Repository Link:
